

**What's happening in the Visual Art Room during terms 1 and 2, 2015 ?**

***MOSAICKING incorporates many of the Visual Art skills taught at Primary School, including creativity, pattern and order, positioning, using tools such as pliers, colour enhancement and placement.***

***PREPS have explored the texture, size, shape and colour of a wide variety of beans and seeds and used these to mosaic a Bilby. These lessons have also incorporated learning about this unique Australian Native animal.***

***GRADES 1 AND 2 have designed their own pattern or picture and are in the process of creating this as a feature onto a ceramic pot using mosaic tiles. They have paid particular attention to shape and colour placement.***

***GRADES 3 AND 4 have looked at and discussed a wide variety of mosaics used for decorative and functional purposes. They have worked on their own designs. Now they are in the process of creating their idea onto a large concrete slab. These will be placed in the maths garden when completed for all to enjoy!***

***GRADES 5 AND 6 have been learning about the history of the origins of mosaics. They have looked at pattern, shape and colour emphasis. They are learning how to use tools safely. Their mosaics are being made with the inclusion of tiles cut to shape. Their mosaics are onto a pliable material which will be able to be adhered to an outdoor area. All will be welcome to view these works of art and many more during our ART SHOW in third term!***

***Mrs Martinussen, Visual Arts Teacher, Rosanna Primary***
